.NET DEVELOPER

Passionate and certified Full Stack .NET Developer with over 5 years of experience in front-end and back-end development, specializing in .NET Core, MVC, Web Forms, and modern web technologies. Skilled in all phases of the Software Development Life Cycle (SDLC), with expertise in building N-tier Client/Server applications using Object-Oriented Design methodologies. Proficient in creating responsive, user-friendly front-end interfaces and scalable, secure back-end services. Seeking a Sr. Software Developer role to apply my diverse skill set and thrive in a dynamic environment that encourages professional and technical growth.

KEY STRENGTHS & SKILLS

Key Skill	Hard-To-Find Skills	Experience (Years)
Object-Oriented Programming (OOP)	C# 8, Razor Pages	5+
MS SQL, Oracle 12c	Procedures, Functions, Profiler	5+
Web API Development	GraphQL, gRPC, Minimal API	5+
Microservices	RabbitMQ, Redis Cache	3+
AWS Services	IAM, EC2	1

EXPERIENCE SUMMARY

- 5+ years of experience as a software developer in evaluation, design, development, testing, maintenance, and production support using the SDLC process.
- Extensive experience and proficiency in Object-Oriented Programming (OOP) using the .NET Framework.
- Proficient in developing scalable back-end services using C#.NET, ASP.NET MVC, and ASP.NET Core. Extensive experience with LINQ and Lambda expressions for efficient querying and data manipulation. Skilled in UWP and ADO.NET for database integration.
- Skilled in creating responsive and dynamic web interfaces using HTML5, CSS3, Bootstrap, and JavaScript frameworks such as Angular, React, and jQuery. Expertise in using Ajax and JSON for asynchronous operations.
- Strong experience building and consuming Web APIs, SOAP APIs, and WCF services for effective communication between distributed systems.
- Accustomed to developing Web-based (Web Forms, ASP.NET MVC, .Net Core) application development.
- Expertise in Entity Framework Core for data access and application management, ensuring efficient database interaction.
- Hands-on experience with MS SQL Server, Firebase, MySQL, and Oracle. Skilled in Redis cache management for optimizing database performance.
- Strong expertise in SQL Server, including designing and managing complex database jobs, creating and optimizing triggers, and developing robust stored procedures and functions. Experienced in leveraging these features to automate tasks, enforce data integrity, and enhance database performance and functionality.
- Competent in using UML for software modeling and design documentation.
- Experience in generating dynamic reports using Crystal Reports and RDLC for business applications.
- Proficient in using Visual Studio, Visual Studio Code, Brackets, Sublime Text, and PyCharm for development and debugging.
- Familiar with GitHub and Bitbucket for version control and collaboration on projects.
- Well-versed in the Repository design pattern for maintaining clean and modular code architecture.
- Experience using tools like Fiddler, Swagger, Postman for API testing and ReSharper for code quality. Adept at project management tools like Trello and Jira for task tracking and collaboration.

- Extensive experience with Entity Framework 6.0, including both Database First and Code First approaches. Proficient in performance tuning and optimization. Familiar with .NET versions 2.2, 3.1, 5, 6, 7, and 8, enabling versatile application development and adaptation across various .NET platforms.
- Proficient in implementing JWT (JSON Web Token) for secure authentication and authorization in web applications. Skilled in generating, validating, and managing JWTs to ensure secure access to protected resources and user data, enhancing overall application security.

TECHNOLOGY SUMMARY

Back-End	C#.NET, ASP.NET MVC, ASP.NET Core, LINQ, UWP, ADO.NET
Front-End	HTML5, CSS3, Bootstrap, Angular, React, JavaScript, JQuery, Ajax, JSON
Web Service	Web API, SOAP API, WCF
ORM	Entity Framework Core
Database	MS SQL Server, Firebase, MySQL, Oracle 12c
Designing Tools	UML
Reporting	Crystal Reports, RDLC
IDE	Visual Studio, Visual Studio Code, Brackets, Sublime Text, PyCharm
Source Control	Github, Bit Bucket
Design Pattern	Repository
Others	Fiddler, Swagger, Postman, Resharper, Trello, Jira

PROFESSIONAL EXPERIENCE

Ascend Technology Inc. (Client: OPUS Technology)

Senior Dot Net Developer

Jun 2019 to Current

Digital Banking System for LankaBangla Finance

Sep 2023 to Current

Developed a digital banking platform for customer registration, loan applications, and Deposit Pension Schemes (DPS) with auto-generated payment schedules. The system requires e-KYC, manages day-end interest provisions, and allows DPS encashment before or after maturity. Built as a microservice, it uses Redis cache for efficient processing and integrates with Nagad mobile banking for seamless payments and collections.

Responsibilities:

- ✓ Developed the product design using **Angular, SQL Server and Asp.Net Core Web API**
- ✓ Integrate the Nagad Payment gateway using Nagad **.Net SDK**
- ✓ Developed all the API of DPS Create, Payments, Encashments in **Asp.Net Core Web API**
- ✓ Developed the backend for Close of Business Day using **SQL Stored Procedure and Angular**
- ✓ Developed **Microservice in .Net API and RabbitMQ** to Manage the SMS and Email Delivery

Technology: C#.Net, ASP.NET MVC Core, Angular 14, Entity Framework Core, SQL Server, TypeScript.

HR & Payroll Management System for ICB Bank Bangladesh PLC.

Jan 2023 to Aug 2023

The system allows employees to update personal and professional information, access salary details, and download pay slips. It supports staff loan applications with automatic installment deductions, manages provident fund contributions, and handles annual tax calculations. The platform also oversees employee lifecycle events such as joining, transfers, promotions, and increments. Banks can generate Annual Confidential Reports (ACRs) based on officer feedback. Built on Oracle 12c for robust data management.

Responsibilities:

- ✓ Developed the backend logic of ACR and implemented the approval routing using **Asp.Net Core**
- ✓ Developed the 'Transfer and Joining' Database structure in **Oracle 12c and MVC Core**

- ✓ Developed the full cycle of staff loan management system, with auto deduction and interest process. I have used **SQL Server Functions, Stored Procedure** here.
- ✓ Developed the TAX calculation as per the policy of National Board of Revenue (NBR) using **Dot Net Core and JavaScript**
- ✓ Developed Promotion and Increment using **Asp.Net Core** in the backend

Technology: C#.Net, ASP.NET MVC Core, Entity Framework, Oracle 12 c, JavaScript, jQuery.

Microfinance Solution for UMOJA Microfinance, Uganda

Apr 2021 to Dec 2022

Description: This microfinance solution manages customer admissions, loan disbursements, and collections, supporting multiple loan products with auto-generated repayment schedules and system-generated vouchers. Loan officers handle repayments, while branch managers oversee activities and performance. Area managers supervise multiple branches. Loan officers reconcile balances daily, verified by branch managers for smooth operations. The system generates financial reports, including Trial Balance, Day Book, Balance Sheet, and Cash Flow statements, streamlining accounting and financial management.

Responsibilities:

- ✓ Lead the full team to Build the Project Successfully
- ✓ Worked on the Member management, Loan Schedule, Loan Collection part Using **SQL Server and MVC Core**.
- ✓ Developed **SQL Stored Procedure** for Accounting Section with Profit Loss, Balance Sheet & Cash Flow.
- ✓ Developed Bad Debt of Loans, Death Insurance & Settlement Section with **Asp.Net Core**.
- ✓ Build UI for data migration from excel using **Razor Pages** so that admin can easily upload their backlog data to the software.
- ✓ Use **Redis Cache Server** to manage the master data to be loaded without calling the database frequently
- ✓ Publish the project for production in **Nginx using Kestrel Server**

Technology: C#.Net, ASP.NET MVC Core, Entity Framework, SQL Server, and JavaScript.

HR & Payroll Management System for Bangladesh Development Bank (BDBL)

May 2020 to Mar 2021

This system manages bank HR operations, allowing employees to update personal and professional information. It handles attendance, salary processing, benefits, bonuses, and staff loans, including disbursement and repayment tracking. Provident fund management ensures accurate deductions and contributions. Employees can view pay slips and check attendance. The system complies with regulations set by the Central Bank of Bangladesh, adhering to local financial and labor policies.

Responsibilities:

- ✓ Worked on the HRM, Payroll module Using **SQL Server 2018 and Asp.Net Core**.
- ✓ Done Recruitment, Attendance, and Resignation Part for HRM portion using **JavaScript, MVC Core and SQL Server**.
- ✓ **Create Linked Server** for Attendance and Leave Application with Approval Matrix.
- ✓ Leave application notification with **SignalR and AJAX**.
- ✓ Email & SMS integration for leave application using **Mailkit SDK**.
- ✓ Develop full Staff Loan and Bonus Module with **SQL server Database** structure.
- ✓ Worked with CBS (Core Banking System) Using **SOAP API** in Payroll and Staff Loan portion.

Technology: C#.Net, ASP.NET MVC Core, Entity Framework, SQL Server, SignalR, jQuery.

Pro-Edge Pundit (Educational Platform)

Dec 2020 to Apr 2020

This platform provides students access to educational content, including video lectures, notes, and supplementary materials. Teachers upload lessons and create structured courses. Students enroll, complete online tests with multiple-choice, descriptive, and short-answer questions, and receive certificates upon passing. Certificates can be verified within the system using a unique certificate number.

Responsibilities:

- ✓ Developed teacher panel to Create Course, Lessons and Upload Lectures Using **Razor Page and SQL Server**.
- ✓ Developed the online exam module using **JavaScript**.
- ✓ Developed the Students panel to manage their individual courses using **jQuery and MVC Core**
- ✓ Track the video lecture completion using **JavaScript**

Technology: C#.Net, ASP.NET MVC Core, Entity Framework, SQL Server, jQuery.

Chatbot for Evercare Hospital of Bangladesh

May 2020 to Nov 2020

Developed a chatbot for Evercare Hospital, a leading healthcare provider in Bangladesh. The chatbot lets patients book doctor appointments, check schedules, view appointment statuses, find branch locations, explore departments and doctors, and submit queries and feedback. Designed as a microservice, it is fully integrated with the hospital's main system, enhancing patient engagement and streamlining service accessibility.

Responsibilities:

- ✓ Designed the full data structure In **SQL server** to fulfill the client needs
- ✓ Integrate the **SignalR with Asp .Net core** and set logics to match the patient questions with data
- ✓ Generate **iframe script** to integrate the chatbot with main project
- ✓ Called **Rest API** to load real time Doctor and Department list from Core Project

Technology: C#.Net, ASP.NET MVC Core, Entity Framework, SQL Server, JavaScript, SignalR, jQuery.

Store Management System for Bangladesh Police

Jan 2020 to Apr 2020

Developed a store management system for Bangladesh Police to manage stores like computer equipment, stationery, and clothing. Users can place product requisitions, which go through a structured supply chain for multiple approvals. Once fully approved, users can collect the requested items from the designated store.

Responsibilities:

- ✓ Designed and Developed the Approval matrix (Raiser, Approver, Final Approver) using **.Net Core**
- ✓ Design product add option and place order backend logics using **JavaScript, Bootstrap** in **Razor Page**
- ✓ Design some monthly reports using **HTML Reporting** in **Dink2PDF**

Technology: C#.Net, ASP.NET MVC Core, Entity Framework, SQL Server, JavaScript, jQuery.

e-Commerce Application for e-Zone Limited

Sep 2019 to Dec 2019

Developed an e-commerce platform enabling customers to browse products by category, add items to their cart or favorites list, and save the cart for later. Customers can place orders with two payment options: cash on delivery and online payment through the SSL Commerz gateway.

Responsibilities:

- ✓ Developed the add to cart section with **JavaScript and CSS**
- ✓ Integrated the online payment gateway using **bKash .Net SDK**
- ✓ Developed the database structure of products and categories with parent child relation in **SQL Server**
- ✓ Work on the add to favorite section using **JavaScript in Razor Page**

Technology: C#.Net, ASP.NET MVC Core, Entity Framework, SQL Server, JavaScript, jQuery.

Club Management System for Bangladesh Engineering Club

Jun 2019 to Aug 2019

Developed a web application for managing club operations, including member admissions, event creation, and media storage. Members can receive important notices, while admins can send group-based messages or emails for announcements. The system streamlines communication and event management for the club.

Responsibilities:

- ✓ Developed the event management section using **MySQL Database**
- ✓ Integrate SMS and email to the system using **Mailkit .Net SDK**
- ✓ Developed user management to keep them in a group. I have used **JavaScript with C#** here

Technology: C#.Net, ASP.NET MVC Core, Entity Framework, My SQL, JavaScript, jQuery.
